The Power of Mindfulness
The Psychology and Neuroscience of Stress Reduction and Resiliency
National Reproductive Health Conference 2014

Disclosures
- Nothing to disclose

Objectives
- Describe what is mindfulness and how it helps interrupt the stress cycle.
- List and practice one short mindfulness exercise that can be integrated into difficult moments of the day or be taught to the patients to work prevent burnout.
- List and practice a key self-compassion practices to practice for self-care and to use with patients in creating healing.

Seminar/Mini-Retreat
- What Makes Us Resilient
- What Gets in the Way
- How Mindfulness and Compassion Help
- How to Apply it to Your Life

What Makes Us Resilient
Let's Take a Walk Down the Street

Benefits of Positive Feelings
- Most of our decisions are made from the emotional center of the brain, positive emotions have a big impact:
  - More open and approaching in life
  - Increase hope and optimism
  - Mediate depressive thinking
  - Bolster immune functioning
  - Increase resiliency

Positive Feelings Include
“If you connect to the world with a sense of meaning and purpose your brain won’t look for artificial boosts.”
- Kindness
- Empathy
- Compassion
- Gratitude
- Hope
- Forgiveness
- Love
- Joy
- Resiliency
Automatic Negativity Bias

- Evolutionary reason
- John Cacciopo - Brain More Sensitive to Negative Information
  - Brain lights up more with negative information than positive
- Want a Good Relationship?
  - John Gottman - 5 Positive Interactions to 1 Negative Interaction
- Want a Good Life?
  - Barbara Fredrickson – 3:1 to feel happy.

How the Brain Changes

Copyright 2013 Elisha Goldstein, PhD

Brain Change Influences Mental Perception

The Mind Influences Brain Change
- State-Dependent Activity
- Trait-Dependent Neuroplasticity

With intention, effort, repetition and strategy we can use the mind to change the brain for the better.

Reactions

Thoughts?
Feelings?
What Kind of Learning?

- Explicit Memory – Memorizing events, facts, dates, names, general knowledge
- Implicit Memory – Memorizing procedures, walking, talking, eating, how to relate to difficult emotions.
- Implicit memory is what we’re after in breaking old emotional procedures and patterns.

Preventing Burnout with Mindfulness and Self-Compassion

Implicit Vs. Explicit: Demonstration

Two Wings to Fly

Learning is a Process: 5 Short Chapters

Why Mindfulness?
A New Way to Treat Emotional Suffering

The sadness or anxiety, hatred, or passion, under the gaze of our concentration and meditation, reveals its own nature. That revelation leads naturally to healing and emancipation.

The sadness, or whatever, having been the cause of pain, can be used as a means of liberation from torment and suffering. We call this using a thorn to remove a thorn. We should treat our anxiety, our pain, our hatred and passion gently, respectfully, not resisting it, but living with it, making peace with it, penetrating into its nature by the meditation on interdependence.

~ Thich Nhat Hanh, The Miracle of Being Awake

Victor Frankl

What The Now Effect is predicated on:

“Between stimulus and response there is a space. In that space is our power to choose our response. In our response lies our growth and our freedom.”

Create Perspective and Choice

Pop into the Present
"Putting Feelings into Words"

Jane

Dick

"Knowing the way you think and where you place your energy allows you to step away from the various stories and mind traps that don't serve you and enter the space of awareness where you can consider alternatives for creating a more flexible, healthier mind."

- The Now Effect

"Putting Feelings into Words"

Fear

Anger

Breath as an Anchor

This is a practice you can do anywhere, anytime to break out of auto-pilot, steady the mind, recenter and refocus. Allow it to be playful.

- See the thought
- Touch or linger with it
- Go gently back to the breath

"Putting Feelings into Words" Research Study Results

Why Self-Compassion

"Being aware of our own suffering with an inclination to help ourselves."

What comes up for you?

The Power of Vulnerability

The Neuroscience of Resiliency
Don’t turn away. Keep your gaze on the bandaged place. That’s where the light enters you.

~ Rumi
13th Century Sufi Poet

It’s Always Here

Wherever you are that’s the entry point.

~ Kabir

Who is Your Compassion Hero?

If Time Slips By?

Forgive yourself for the time gone by and in this moment of awareness invite yourself to begin again.

What is the Secret?

How
Did the rise
Eter open its heart
And give to this world
All its
Beauy?
It felt the encouragement of light
Against its
Brine,
Otherwise,
We all remain
Too
Frightened.
